THE FUELBOX

RED DIESEL / GAS OIL IN A BOX

CONTAINING THE REVOLUTIONARY

UN approved 20 Litre bag in box system.

A unique specially formulated Additive System, achieving an outstanding performance over conventional Red Diesel/Gas Oil.

- A fast efficient, easy to handle, refuelling solution.
- Glug free pouring system prevents unnecessary spillages.
- Zero risk of contamination.
- Reduce downtime by storing onboard your vehicle in case of emergencies / runouts onsite.
- **Help lower your carbon footprint and meet your sustainability goals. After use this product reduces packaging waste in landfills by 86% and reduces plastic consumption by up to 90%, compared to 20-litre rigid packaging.**
- Improved cetane rating (boosts power).
- Improves combustion efficiency.
- Improves fuel consumption.
- Reduced visible emissions (smoke).
- Protects against wear in fuel pumps / injectors.
- Enhances the performance of older engines.
- Disperses existing sludge build-up.
- Contains demulsifiers to combat water build-up.
- Reduces deposit and varnish build-up.
- Improves storage stability (up-to 2 years).
